*Allowable Subject Matter*

1. Claims 18-27 and 29-39 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record neither anticipates nor renders obvious a cutting bit (independent claim 18), a disc milling cutter (independent claims 31 and 39) as claimed, specifically wherein the cuboidal body as claimed includes each of the raised corner regions including a relief surface extending to a respective side face to form a cutting edge at a transition thereof with the respective side face.

The closest prior art of record is US Pat. No. 6,053,672 (Satran et al.) as is discussed in detail in the previous office action.

Applicant's arguments as to '672 teaching a rake surface instead of a relief surface as is currently claimed with the cutting bit structure was persuasive.

It is noted that it is well known in the art to have a cuboidal body with raised diagonally opposed corner regions as claimed as is taught by '672 (see also US 5,800,100; US 5,207,538, for example).

However, as Applicant notes in the Amendment filed 21 October 2004 in regard to '672, in the prior art, the raised diagonally opposed corner regions provide a *rake* surface extending to a respective side face to form a raised cutting edge at a transition thereof with the respective side face, not a *relief* surface as is currently claimed.

Therefore '672 does not anticipate the claimed invention of independent claims 18, 31 or 39.

Art Unit: 3722

Furthermore, there is no prior art, either alone or in combination with '672 that would render obvious the claimed invention of independent claims 18, 31 or 39, and no motivation found to make the relief surface of '672 a rake surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
